MANDATORY CHEMICAL STORAGE AND USE QUESTIONNAIRE (FILE NO. 104.0812)

The California Regional Water Quality Control Board, Region 4, is the public agency with primary responsibility for the protection of ground and surface water quality for all beneficial uses within the region.

As part of the statewide monitoring program (AB1803) being conducted under the direction of the California Department of Health Services, ground water wells in your area have been sampled. The results of the sampling indicate the presence of organic contaminants in the ground water.

Your facility is geographically within the area of concern and may be engaged in practices which might require the storage and use of chemicals such as solvents, oils, fuels, etc. Therefore, pursuant to Section 13267(b) of the California Water Code, you are requested to complete the attached questionnaire to provide information on past or present chemical storage or use at your facility. In addition to completing the questionnaire, specify the type of sewer system (private, municipal, industrial) used at your site. Please return the completed questionnaire to the Regional Board by April 22, 1987. The return of this questionnaire, properly signed, is required even if no chemical is stored or used at your facility. If you are new owners, complete the questionnaire to the best of your ability and provide available data concerning the past owners including contact and phone number.

If your facility is currently conducting or has in the past conducted an investigation associated with soil or ground water contamination, please include a copy of the findings or relevant information along with the questionnaire.

If you have any questions, please call either Jon Bishop at (213) 620-2997, Philip Chandler at (213) 620-2385 or Roy Sakaida at (213) 620-4699.
